

Curriculum Vitae

Jasmine Darman

Game Designer/Programmer/Educator

Jelloismynick@gmail.com

[Jasmine Darman | LinkedIn](#)

Jasmine Darman is a game designer specializing in virtual reality immersion, game design education, and fantasy-driven storylines. Her main focus is programming and development within Unity Engine.

Education

Expected Graduation: Spring 2026

Master's in Digital Media at the University of Central Florida

2024

Bachelor's of Game Design in Games and Interactive Media at the University of Central Florida (UCF)

Experience

Aug 2025 - Current

Graduate Teaching Associate

Teaching UCF's Computer as a Medium course for undergraduate game design students. This involves heavy grading work, troubleshooting technology issues in Unity, delivering lectures on Unity, and managing conflicts within a college-level classroom.

May 2024 - Aug 2025

Maker Space Assistant

Managing part-time UCF's downtown Makerspace. This involves planning and advertising workshop events, instructing students on various makerspace tools, managing security and passwords, and handling the technology within the space. This technology includes OptiTrack, Ultimaker, Glowforge, Form 3, Fusion Edge, Weller Stations, and Virtual Reality(VR) devices.

Feb 2024 - May 2024

Intern for RealityFlow, OPS Student

Developing educational materials for a UCF Summer Workshop, along with aiding in overseeing a group of computer science majors as they develop the educational software Reality

Flow. Materials involved template learning builds with Unity's visual scripting and VR, PowerPoints, and time-sensitive lesson plans.

Oct 2022- Feb 2024

Volunteer After-School Educator

Teaching after school at Evan's High School through VR Creators. This involved managing, cleaning, and setting up VR headsets from UCF to Evan's. Planned lessons around the current technology, students' understanding, and various topics within game design to allow students a chance to play and explore concepts. This became a summer UCF-hosted workshop.

Video Games

Sundrop Jan 2024

Art Director, Artist

Awarded 3rd Place in the Florida Interactive Entertainment Academy's Collegiate Game Jam. Oversaw the visual direction and color design to evoke a post-apocalyptic fantasy atmosphere, emphasizing tonal cohesion and thematic clarity.

Cat Meoir: Feline Detective May 2024

Programmer

Developed specialized gameplay systems, including a custom save framework, object recognition for in-game photography, and user interface functionality to enhance player interaction and usability.

VRK Haunted House Nov 2023

Project Manager, Programmer, Designer, Sound Designer, Event Manager

Led a volunteer team from UCF's Virtual Reality Knights to produce a room-scale VR experience. Managed development milestones and coordinated event presentation at the UCF Student Union. Contributed to level design, sound production, and overall creative direction.

Buggy Virus Jul 2023

Project Manager, Programmer, Gameplay Designer

Directed a week-long Major Game Jam project, overseeing task distribution, progress tracking, and core gameplay implementation. Focused on designing mechanics that build progressive intensity while maintaining a balanced gameplay loop.

Evil Overlord: Soon-to-be Ruler of All Jun 2023

Writer, Art Director, Artist

Authored branching narrative paths for this nonlinear storytelling experience. Led art direction with an emphasis on vivid, saturated hues—purples and reds—set against a darkly atmospheric environment to enhance thematic contrast.

The Potions Predicament Apr 2023

Writer, Art Director, Artist

Served as lead writer, crafting dialogue to establish engaging character dynamics. Directed the art style toward a cohesive fantasy aesthetic, integrating character design, spatial composition, and lighting to support narrative tone.

Deep Sea Scourge Mar 2023

Project Manager, Programmer

Supervised a six-person development team, managing workflow through ClickUp and contributing core programming features for an action-oriented isometric game.
